

Divyam Joshi

Bachelor of Technology in Computer Science and Engineering — 2027
+91 9717544971 — divyamjoshi.kumar.23cse@bmu.edu.in — LinkedIn — GitHub
Portfolio — Engineering Playbook — Change Blueprint

Education

B.Tech., Computer Science & Engineering, BML Munjal University, Haryana 2023–2027
CGPA: 8.46/10
Senior Secondary School Certificate (Class XII), CBSE, Uttar Pradesh 86.7%
Science Stream

Skills

Development: C++, Java, JavaScript, TypeScript, React, Node.js, Express, OOP, System Design
AI & Data Science: Python, TensorFlow, PyTorch, Keras, Scikit-learn, Machine Learning, Deep Learning
Tools & Databases: MySQL, PostgreSQL, MongoDB, Git, Docker, Kubernetes, AWS, Linux, Puppeteer

Projects

Temporal Traffic Forecasting via Deep Learning Jan 2025 – May 2025

- Architected LSTM, GRU, and TCN frameworks using TensorFlow and Keras for analysis on time-series datasets.
- Appraised predictive accuracy through hyperparameter tuning; validated results via Mean Absolute Error and Root Mean Square Error.

Petrol Price Estimator Using Ensemble Techniques Jan 2025 – May 2025

- Synthesized real-time pricing trends utilizing Puppeteer and Python to generate a dynamic, self-updating repository.
- Executed Random Forest, Gradient Boosting, and Ridge Regression methodologies to confirm results via R^2 scores.

AI Hex Game Engine Sep 2025 – Dec 2025

- Devised a Hex engine using PyTorch and Pygame featuring Alpha-Beta Pruning, MCTS, and Neural MCTS agents.
- Analyzed agent efficiency employing PUCT-based exploration for sophisticated strategic decision-making logic.

RAG-Powered Multi-Agent Financial Assistant Jan 2026 – Feb 2026

- Built a retrieval-augmented generation framework utilizing LangChain and ChromaDB for precise knowledge extraction from custom-scraped financial datasets
- Analyzed user sentiment and financial literacy employing generative multi-agent orchestration to dynamically tailor conversation tactics and risk profiles.

Experience

Enercore — *Web Developer Intern* May 2025 – Jul 2025

- Orchestrated automated billing modules and enhanced interface components for the Enercore digital environment.
- Consolidated a market monitoring pipeline to aggregate industry updates via scheduled Cron jobs.

Achievements & Responsibilities

- Launched a socket-based Pokemon-style web MMORPG featuring real-time battle and capture mechanics.
- Maintained the technical evolution and feature updates for a Cobblemon community server.
